Education

Azerbaijan Technical University Bachelor's Degree **Sep 2018 - May 2022**
Baku

Employment

.Net Developer **Jul 2024 - Present**
GREENTEK GROUP MMC, Baku
We built a global payment and banking system using a microservices architecture. With tools like PostgreSQL, RabbitMq, Vault, and Redis, we created a scalable and
secure infrastructure. I worked on adding new features, integrating third-party services, and setting up a service billing system, all while helping to improve the overall stability of the architecture.

.Net Developer **Jun 2023 - Jun 2024**
Alfasoft MMC, Baku
During my internship, I supported and maintained existing enterprise-level projects by identifying and resolving bugs to ensure system reliability. I developed RESTful Web APIs using .NET 5/6/8, adhering to clean code practices and applying layered architecture principles. I worked with both Dapper and Entity Framework Core (EF Core) for data access, utilizing MSSQL as the primary database. Additionally, I gained hands-on experience with microservices architecture by contributing to the development of new services. This included working with PostgreSQL for database management, RabbitMQ for message queuing, and Redis for caching and fast data retrieval. Through this experience, I significantly strengthened my skills in software architecture, debugging, and backend development within a real-world team environment.

Technologies used: .NET 5/6/8, Web API, EF Core, Dapper, MSSQL, PostgreSQL, RabbitMQ, Redis, Microservices, REST, Git

Courses

STEP IT Academy **Jun 2022**
At Step IT Academy, I focused on backend development with C# and .NET. I learned how to build APIs, work with databases using SQL, and use tools like Entity Framework and Dapper. Along the way, I improved my understanding of OOP, clean coding, and how to structure backend projects effectively.

Skills

Languages: C#, SQL

Technologies/Frameworks: OOP, ORM, Design Patterns, Microservices, Clean, N-Layer Architectur, Asp.Net Core, RestFul Web Api, Entity framework core, Dapper, Redis, RabbitMQ, Vault, MSSQL,PostgreSql, Serilog, Git, GitHub, GitLab, JWT Token, SignalR, gRPC

Personal: Teamwork skills, Hardworking , Communication skills, Problem-solving, Creative thinking
